

```
#include<stdio.h>
int main()
{
int x = 5 ;
int y = 2;
Printf("%d", x + y);
Printf("%d", x - y);
Printf("%d", x * y);
Printf("%d" , x / y);

return 0;
}
```

Output:

$x + y = 7$

$x - y = 3$

$x * y = 10$

$x / y = 2$  ( because we are using int )
